

The diagram illustrates a KNX bus system with 16 channels. The top part shows a 3-phase supply (L1, L2, L3, N) connected to 16 lamps. The bottom part shows the internal components of the bus system, including 16 channels labeled A through H, each with a switch and a microcontroller (μ). The system is connected to a KNX bus and a power source (250/440 V).

- 1 Schildträger
- 2 Taste Programmieren
- 3 LED Programmieren, rot
- 4 Anschlussklemme KNX
- 5 Schaltstellungsanzeige und EIN / AUS Betätigung
- 6 Laststromkreis, je 2 Schraubklemmen

- 1 Label carrier
- 2 Programming key
- 3 Programming LED, red
- 4 Connecting terminal KNX
- 5 Switch position display and
ON / OFF operation
- 6 Load current circuit, each with 2 screw
terminals
